Sebentar lagi kita mulai ya
- 17:43:23 From JKT-D6333-Realrich Sjarief : Ditunggu pertanyaannyaya 🙏
- 17:47:56 From CM-306 prakusya metta : thanks for the opportunity to ask, how to determine the shape of the flexible building? the space first, or the space is formed from the shape of building?
- 17:48:00 From CM-051\_Indah Amalia : woww so beautiful building, I wanna know.. is there any special treatment for maintenance/taking care of bamboo buildings?
- 17:59:54 From CM-357-Febri Afiantoro : very interesting, how the bamboo can withstand the weather if the building is in direct contact with the climate?
- 18:02:10 From CM-213 nurudin : It is interesting to say that this architecture was built on the philosophy of nature and high tech, including strong ecological reasoning. I wonder if this implies that this architecture is more adaptable to the Covid-19 situation? For example, how adaptive is this architecture in anticipating the need for open space and safe distancing?  
Thank You
- 18:07:48 From CM-300 Nicole Sidney : HI, thank you for the inspiring presentation. I wanna ask about how do you deal with the local craftsmanship with the complexity of the bamboo construction that maybe proposed in a new way/ the local craftsman are not used to?
